OPERATIVE

C++ Software Engineer

Operative is a world leading revenue accelerant for media companies around the world. No other software company in AdTech space, brings a comparable depth of experience to create truly innovative software that performs across all platforms, revenue models and business units. We provide software- based solutions which helps clients manage advertisements both in the linear (TV) and digital space. We have been in the market for over two decades and have 1100+ employees with 12 offices spread across the globe.

Operative is proud to play a pivotal role in the way advertising is bought, sold and managed across media industry.

JOB SUMMARY

We are looking for a C++\SQL Developer with experience in building high-performing, scalable, enterprise-grade applications. You will be part of a talented software team that works on mission-critical applications.

The roles and responsibilities would include designing and programming C++ applications and converting requirements received from the product team to software designs.

What is the job about:

- Architecture, design, and programming in an enterprise n-tier application.
- Become a valued member of an autonomous, cross-functional agile team
- Design and program C++\ORACLE based applications.
- Become a central part of our development groups, learning from and collaborating with our engineers and product managers across the company.
- Work and collaborate with world leading media companies.
- Experience in transforming requirements to software design.

If you are the one, than you must have:

- Bachelor's or master's degree in computer science or equivalent
- Experience in C++ and SQL- a must
- Must have hands on experience in Object-oriented programming concepts.
- Strong application design and implementation skills
- Strong communication skills and experience working with internal and external customers.
- Great interpersonal skills, ability to understand and work together with business teams.
- Team player, accountable, dedicated, and passionate
- Fluent English – speaking reading and writing.
- Knowledge in Jira or other ALM tools – Advantage
- Good working experience in Scrum/Agile environment - Advantage
